My Numbers menu

The SIP Trunk Call Manager app offers users an additional way to access a subset of inbound routing functionality as subscribed at www.siptrunkcallmanager.com. Once logged in users are greeted with a list of DDI numbers from their company account, a Business Continuity tab to filter numbers that have an active or inactive validated DR call plan and an options tab containing information about the app, a help section and the logout option.

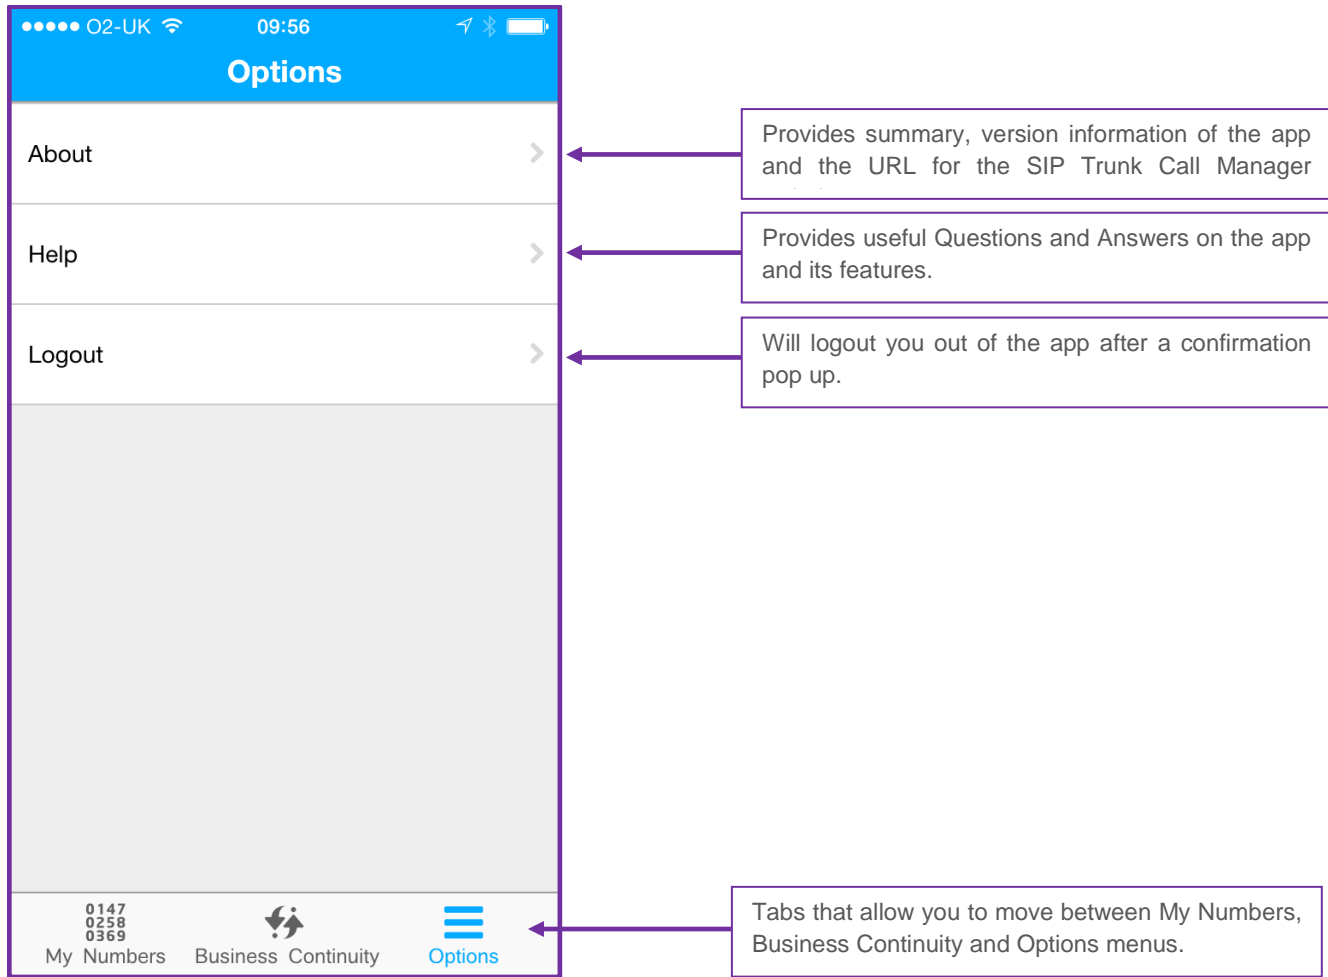

Business Continuity menu

The Business Continuity screen on the app provides a user with on the move two click activation of predefined and validated DR plans created on the Inbound Portal. The screen displays them in two states, active or inactive, and allows for quick and simple activation or deactivation of the DR plan. Deactivation restores the previously active Stored Call Plan.

The screenshot shows the Business Continuity screen with the following elements and callouts:

- Search bar:** A white search bar at the top with the text "Search". Callout: "The search feature will allow you to filter results against the number or description fields."
- Toggle buttons:** Two buttons labeled "Inactive" and "Active". Callout: "Toggle and filter between numbers that have Inactive or Active validated DR call plans."
- List of numbers:** A list of three items, each with a checkbox and text: "01212275402 Birmingham Sales", "01613937130 Manchester Sales", and "02038377196 London Sales". Callout: "Numbers that have validated and inactive DR plans will appear in a list here. Each number can be individually selected by use of the check box for immediate activation of its defined DR plan. The user defined description is also displayed. When toggled the numbers with Active plans will be..."
- Action buttons:** "Select All" and "Activate" buttons at the bottom of the list area. Callout: "Select All option will tick all boxes within the list. Activate will activate any ticked numbers. The toggled option will deactivate a checked numbers DR plan and return the number back to the last active Stored Call Plan."
- Bottom navigation bar:** Three tabs: "My Numbers" (with phone numbers 0147, 0258, 0369), "Business Continuity" (with a lightning bolt icon), and "Options" (with a hamburger menu icon). Callout: "Tabs that allow you to move between My Numbers, Business Continuity and Options menus."

Options menu

My Number sub-menu

The My Number sub-menu gives the user access to a range of services that can be activated or viewed from a smart device whilst on the move.

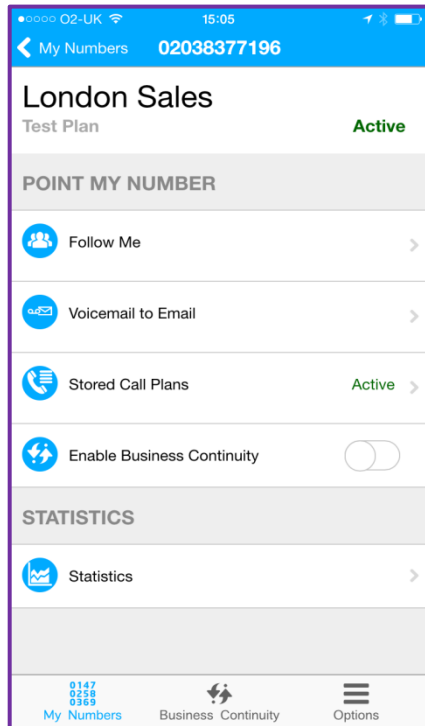

The screenshot shows the 'My Number' sub-menu for the number 02038377196. The menu is titled 'London Sales' and 'Test Plan' with an 'Active' status. It is divided into sections: 'POINT MY NUMBER' with options like 'Follow Me', 'Voicemail to Email', 'Stored Call Plans', and 'Enable Business Continuity'; 'STATISTICS' with a 'Statistics' option; and a bottom tab bar with 'My Numbers', 'Business Continuity', and 'Options'.

Callouts provide the following details:

- Back button:** Back button to previous menu and details of the number being viewed.
- Header:** Information about the user defined description, most recent call plan used and the call plan status of the selected number.
- POINT MY NUMBER section:** Shows the app call control options and which Point My Number option is Active.
 - Follow me:** Point your number to one or more destinations which will ring simultaneously when your number is called.
 - Voicemail to Email:** Point your number to voicemail and receive the recorded message to a defined email address.
 - Stored Call Plans:** Point your number to an existing call plan previously created on the SIP Trunk Call Manager Portal.
 - Enable Business Continuity slider:** One touch activation of your SIP Trunk Call Manager Portal defined DR plan. If no DR plan is set option will be greyed out.
- Statistics section:** Access to the performance statistics associated to the number selected.
- Bottom Tab Bar:** Tabs that allow you to move between My Numbers, Business Continuity and Options menus.

How to use the Follow Me service

The Follow Me service is exclusive to the app and allows you to point your number up to three destinations which will ring simultaneously when the inbound number is called. You can enter a number freehand or select from your contacts list.

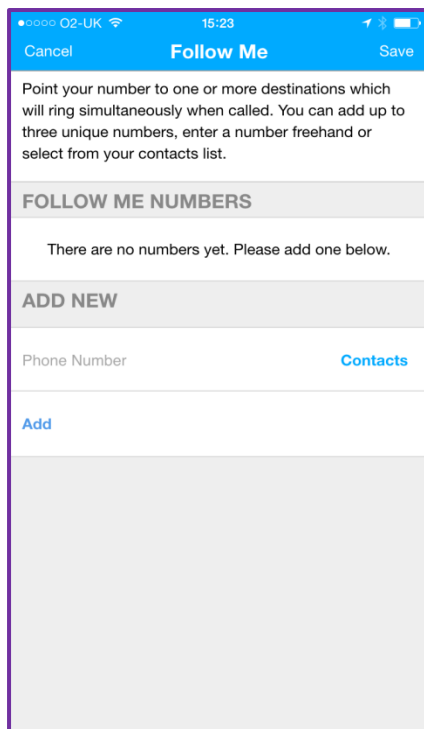

Info bar shows the current status of the SIP Trunk Call Manager call plan, i.e. The Stored Call Plan called "Call Plan" is active.

Enter Follow Me sub-menu.

Shows that an SIP Trunk Call Manager Stored Call Plan is Active.

You will now presented with the Follow Me menu screen

Under the Add New banner you can either enter destination details freehand or choose from the devices contact directory, then click Add. You can repeat this process adding up to three destinations.

You can add up to three destination numbers.

Click save and when prompted click yes to confirm you wish to immediately activate the follow me plan.

The freehand inputs or selected contact destinations will appear under the Follow Me

The Follow Me plan will be immediately activated and the app will return you to the My Number menu.
