

AI-Powered Cybersecurity and Insurance for SMBs

Instantly detect your business data on the dark web and get insured against claims and defence costs.

Cyber Insurance

Insurance backed by Chubb to protect SMBs from cyber incidents. Covers privacy liability claims, defence costs, regulatory fines, and penalties.

DarkWeb Monitoring

Find out if your data has been leaked. SafeWeb scans the dark web for exposed emails, passwords, and sensitive data tied to your domain. When we find a match – and we invariably do – you’re alerted instantly, with clear next steps.

Incident Response

In a breach, speed and clarity matter. SafeWeb’s guided Incident Response helps assess severity, understand what’s happening, who to notify, and how to act.

Privacy Toolbox

Stay compliant with customisable templates – from data policies to consent forms – build to protect privacy rights and simplify compliance.

Phishing simulation

Phishing is one of the most common threats. Our simulation trains your team to spot and avoid real-world phishing attacks before damage is done.

Simple, Smart Protection for SMBs

We believe small businesses deserve better. That’s why we make cybersecurity, compliance, and insurance accessible, affordable, and easy – delivered through trusted resellers who know your business.
